

Stainless Steel Bollard Covers

Adding a touch of protective elegance is simple and fast. The 1-800-BOLLARDS Stainless Steel Bollard Covers add a clean and modern look around any setting. These corrosion-resistant covers are manufactured from 304 or 316 grade steel and polished to a #4 finish for long last durability.

Aesthetics play a key role with Stainless Steel covers. That's why 1-800-BOLLARDS cover

designs can match any building architecture and landscape design with the selection of a cover cap style: Flat, Dome or Sloped. While the standard cover height is 36", other heights are available to fit taller bollards.

Stainless Steel Bollard Covers installed over new and existing bollards and posts look impressive and provide maintenance-free protection for many years.
